

Print Client Name:		Client Identification Number:		Date:	<b>Adult 65D-30 Intervention</b> <b>ASAM Level .05</b>	
Mock Client		57866		02/26/20		
<b>DIMENSIONS</b>	<b>[1] ADMISSION CRITERIA</b>	Circle all items in each dimension that apply to the client. Place a check in the <b>appropriate</b> box that indicates validation or lack of validation for placement into this level of care.			<b>YES</b>	<b>NO</b>
<b>ASAM Requirements</b>	Must meet one of the Dimensions of 4, 5, or 6 and any identifiable problems in Dimensions 1, 2 or 3 that are stable or being addressed through appropriate outpatient medical or mental health services.			<input type="checkbox"/>	<input checked="" type="checkbox"/>	
<b>Dimension 1:</b> Acute Intoxication and/or Withdrawal Potential	The client's status in this dimension is characterized by one of the following: <input type="checkbox"/> a. Client is free from intoxication or withdrawal symptoms/risks; or <input type="checkbox"/> b. The client's intoxication or withdrawal symptoms/risks can be managed at this level of care.			<input type="checkbox"/>	<input checked="" type="checkbox"/>	
<b>Dimension 2:</b> Biomedical Conditions and Complications	None or very stable- Any biomedical conditions are stable or are being actively addressed and will not interfere with interventions at this level of care.			<input checked="" type="checkbox"/>	<input type="checkbox"/>	
<b>Dimension 3:</b> Emotional, Behavioral or Cognitive Conditions and Complications	None or very stable - Any emotional, behavioral or cognitive conditions or complications are being addressed through appropriate mental health services and will not interfere with interventions at this level of service.			<input type="checkbox"/>	<input checked="" type="checkbox"/>	
<b>Dimension 4:</b> Readiness to Change	Willing to understand how current use may affect personal goals - The client expresses a willingness to gain an understanding of how his/her current use of alcohol and/or other drugs may interfere with meeting responsibilities and achieving personal goals.			<input checked="" type="checkbox"/>	<input type="checkbox"/>	
<b>Dimension 5:</b> Relapse/Continued Use Potential	Needs understanding of, or skills to change current use patterns. The situation is characterized by one of the following: <input type="checkbox"/> a. The client does not understand the need to alter the current pattern of use of substances to prevent further harm related to such use; or <input checked="" type="checkbox"/> b. The client needs to acquire the specific skills needed to change his/her current pattern of use.			<input checked="" type="checkbox"/>	<input type="checkbox"/>	
<b>Dimension 6:</b> Recovery Environment	Social support system or significant others increase risk for personal conflict about alcohol/drug use. The client's living environment is characterized by one of the following: <input checked="" type="checkbox"/> a. The social support system is composed primarily of individuals whose substance use patterns prevent them from meeting social, work, school or family obligations; or <input type="checkbox"/> b. Family members currently are abusing substances, increasing the client's risk for substance related disorder; or <input type="checkbox"/> c. Significant others express values concerning alcohol or other drug use that create significant conflict for the client; or <input type="checkbox"/> d. Significant others condone or encourage inappropriate use of alcohol or other drugs.			<input checked="" type="checkbox"/>	<input type="checkbox"/>	
<b>Recommendations/Notes:</b> does this level of care recovery environment is fair. Needs counseling for anxiety. Potential for relapse is high. Does have insight and verbalizes readiness to change.

Print Client Name:		Client Identification Number:		Date:		<b>Adult 65D-30 Outpatient ASAM Level I</b>	
Mock Client		57866		02/26/20			
<b>DIMENSIONS</b>	<b>[1] ADMISSION CRITERIA</b>	Circle all items in each dimension that apply to the client. Place a check in the <b>appropriate</b> box that indicates validation or lack of validation for placement into this level of care.				<b>YES</b>	<b>NO</b>
<b>ASAM Requirements</b>	Meets criteria in all six dimensions.				<input type="checkbox"/>	<input checked="" type="checkbox"/>	
<b>Dimension 1:</b> Acute Intoxication and/or Withdrawal Potential	The client's status in this dimension is characterized by one of the following: <input type="checkbox"/> a. Client is free from intoxication or withdrawal symptoms/risks; or <input type="checkbox"/> b. The client's intoxication or withdrawal symptoms/risks can be managed at this level of care.				<input type="checkbox"/>	<input checked="" type="checkbox"/>	
<b>Dimension 2:</b> Biomedical Conditions and Complications	None or very stable - The client's biomedical conditions, if any, are stable enough to participate in outpatient treatment.				<input checked="" type="checkbox"/>	<input type="checkbox"/>	
<b>Dimension 3:</b> Emotional, Behavioral or Cognitive Conditions and Complications	None or very stable - The situation is characterized by all of the following: <input type="checkbox"/> a. The client's anxiety, guilt and/or depression, if present, appear to be related to substance-related problems rather than to a coexisting psychiatric/emotional/behavioral or cognitive condition. If they are related to such a condition, appropriate care is being provided concurrent with ASAM Level I; and <input type="checkbox"/> b. The client's mental status does not preclude his/her ability to understand the materials presented or to participate in the treatment process; and <input checked="" type="checkbox"/> c. The client is assessed as not posing a risk of harm to self or others. <b>Dual Diagnosed Enhanced Programs</b> In addition to the foregoing criteria, either (a) or (b) and (c) and (d) characterize the client's status in Dimension 3. <input type="checkbox"/> a. The client has a severe and persistent mental illness that impairs his or her ability to follow through consistently with mental health appointments and psychotropic medication. The client maintains the ability to access services such as assertive community treatment and intensive case management or supportive living designed to help the client remain engaged in treatment; or <input checked="" type="checkbox"/> b. The client has a severe and persistent mental disorder or other emotional, behavioral or cognitive problems, or substance-induced disorder; and <input type="checkbox"/> c. The client's mental health functioning is such that he or she has impaired ability to: [1] understand the information presented, and [2] participate in treatment planning and the treatment process. Mental health management is required to stabilize mood, cognition and behavior; and <input checked="" type="checkbox"/> d. The client is assessed as not posing a risk of harm to self or others and is not vulnerable to victimization by another.				<input type="checkbox"/>	<input checked="" type="checkbox"/>	
<b>Dimension 4:</b> Readiness to Change	The situation is characterized by (a) and (b) or (c) or (d): <input checked="" type="checkbox"/> a. The client wants to adhere to the treatment plan and attend all scheduled activities; and <input type="checkbox"/> b. The client admits to a substance abuse and/or a mental health problem but requires monitoring and motivating strategies. A structured residential program is not required; or <input checked="" type="checkbox"/> c. The client is ambivalent about or does not recognize that he or she has a substance-related and/or mental health problem; or <input type="checkbox"/> d. The client may not recognize that they have a substance-related and/or mental health problem. They may require monitoring and motivating strategies to engage in treatment and to progress through the stages of change				<input checked="" type="checkbox"/>	<input type="checkbox"/>	

<b>Dimension 5:</b> Relapse/Continued Use Potential	Able to maintain abstinence and pursue recovery goals with minimal support - The client is assessed as being able to achieve or maintain abstinence and recovery goals only with support and scheduled counseling to assist in dealing with issues that include mental preoccupation with alcohol or other drugs, craving, peer pressure, lifestyle, attitude changes and other treatment plans issues. <b>Dual Diagnosed Enhanced Programs</b> In addition to the criteria listed above, the client is assessed as able to achieve or maintain mental health functioning and related goals only with support and scheduled therapeutic contact to assist him or her in dealing with issues that include (but are not limited to) impulses to harm self or others and difficulty in coping with his or her affects, impulses or cognition.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>Dimension 6: Recovery Environment</b>	The situation is characterized by one of the following: <input type="checkbox"/> a. A sufficiently supportive psychosocial environment makes outpatient treatment feasible; or <input checked="" type="checkbox"/> b. Although the client does not have an ideal primary or social support system to assist with sobriety, he or she has demonstrated motivation and willingness to obtain such a support system; or <input type="checkbox"/> c. Family and significant others are supportive but require professional interventions to improve the client's chance of treatment success and recovery. <b>Dual Diagnosed Enhanced Programs</b> In addition to the criteria listed above, (a) or (b) or (c) characterizes the client's status in Dimension 6. <input type="checkbox"/> a. The client does not have an adequate primary or social support system and has mild impairment in his or her ability to obtain a support system; or <input type="checkbox"/> b. The family guardian or significant others require active family therapy or systems interventions to improve the client's chances of treatment success and recovery; or <input checked="" type="checkbox"/> c. The client's status in Dimension 6 is characterized by all of the following: (1) the client has a severe and persistent mental disorder or emotional, behavioral or cognitive problem, and (2) the client does not have an adequate family or social support system, and (3) the client is chronically impaired, however, not in imminent danger, and limited ability to establish a supportive recovery environment. (The client however, does not have access to intensive outreach and case management services that can provide structure and allow him or her to work toward stabilizing both the substance and mental health related disorders). The client does however, have access to intensive outreach and case management services that can provide structure and allow them to work toward stabilizing both the substance related and mental disorders.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Recommendations/Notes:</b> Does not meet requirements for this level of care          <div style="display: flex; justify-content: space-between; align-items: flex-end;"> <span>Print Counselor Name: Beth Pidcock2</span> <span>Counselor Signature/Credential:</span> <span>Date: 06/29/18</span> </div>			

Print Client Name:		Client Identification Number:		Date:	<b>Adult 65D-30 Intensive Outpatient ASAM Level II.1</b>	
Mock Client		57866		02/26/20		
<b>DIMENSIONS</b>	<b>[1] ADMISSION CRITERIA</b>	Circle all items in each dimension that apply to the client. Place a check in the <b>appropriate</b> box that indicates validation or lack of validation for placement into this level of care.			<b>YES</b>	<b>NO</b>
<b>ASAM Requirements</b>	Must meet Dimensions 1, 2, or 3 and one of Dimensions 4, 5, or 6. Transfer criteria: Clients may be transferred to this level of care when they have met essential treatment objectives in a more intensive level and require this intensity of service provided at this level of care in at least one dimension. A client may transfer from ASAM Level I when services at that level have been insufficient to address the client's needs or when ASAM Level I has consisted of motivational interventions to prepare the client for participation in a more intensive level of care for which admission criteria are met.			<input checked="" type="checkbox"/>	<input type="checkbox"/>	
<b>Dimension 1:</b> Acute Intoxication and/or Withdrawal Potential	The client's situation in this dimension is characterized by one of the following: <input type="checkbox"/> a. Client is free from intoxication or withdrawal symptoms/risks; or <input checked="" type="checkbox"/> b. The client's intoxication or withdrawal symptoms/risks can be managed at this level of care.			<input checked="" type="checkbox"/>	<input type="checkbox"/>	
<b>Dimension 2:</b> Biomedical Conditions and Complications	None or not a distraction from treatment and manageable in ASAM Level II.1. The client's biomedical conditions, if any, are stable or are being concurrently addressed and will not interfere with treatment at this level of care.			<input checked="" type="checkbox"/>	<input type="checkbox"/>	
<b>Dimension 3:</b> Emotional, Behavioral or Cognitive Conditions and Complications	<p>Problems in Dimension 3 are not necessary for admission to a Level II.1 program. However, if any of the Dimension 3 conditions are present, the client must be admitted to either a Dual Diagnosis Capable or Dual Diagnosis Enhanced program, depending on the client's level of functioning, stability and degree of impairment in this dimension.</p> <p><b>Dual Diagnosed Capable Programs</b> The client's status in Dimension 3 is characterized by (a) or (b): <input type="checkbox"/> a. The client engages in abuse of family members or significant others, and requires intensive outpatient treatment to reduce the risk of further deterioration; or <input checked="" type="checkbox"/> b. The client has a diagnosed emotional, behavioral or cognitive disorder that requires intensive outpatient monitoring to minimize distractions from their treatment or recovery.</p> <p><b>Dual Diagnosed Enhanced Programs</b> The client's status in Dimension 3 is characterized by (a) or (b) or (c): <input checked="" type="checkbox"/> a. The client has a diagnosed emotional, behavioral or cognitive disorder that requires management because the client's history suggests a high potential for distracting him or her from treatment; such a disorder requires stabilization concurrent with addiction treatment; or <input type="checkbox"/> b. The client is assessed as at mild risk of behaviors endangering self, others or property; or <input type="checkbox"/> c. The client is at significant risk of victimization by another. However, the risk is not severe enough to require 24-hour supervision.</p>			<input type="checkbox"/>	<input checked="" type="checkbox"/>	

<b>Dimension 4:</b> Readiness to Change	Resistance high enough to require a structured program but not so high as to render outpatient treatment ineffective. The client's status in this dimension is characterized by one of the following: <input type="checkbox"/> a. The client requires structured therapy and a programmatic milieu to promote treatment progress and recovery because of failure at different levels of care. Such interventions are not likely to succeed at ASAM Level I service; or <input type="checkbox"/> b. The client's perspective inhibits his/her ability to make behavior changes without clinically-directed and repeated structured motivational interventions. Such interventions are not feasible or not likely to succeed at ASAM Level I service. The client's resistance, however, is not so high to render the treatment ineffective. <b>Dual Diagnosed Enhanced Programs</b> The client status in Dimension 4 is characterized by (a) or (b) or (c): <input type="checkbox"/> a. The client is reluctant to agree to treatment and is ambivalent about his or her commitment to change a co-occurring mental health problem; or <input type="checkbox"/> b. The client's follow through in treatment is so poor or inconsistent that Level services are not succeeding or are not feasible; or <input type="checkbox"/> c. The client is assessed as requiring intensive services to improve his or her awareness of the need to change. The client has such limited awareness of or commitment to change that he or she cannot maintain an adequate level of functioning with out Level II.1 services.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Dimension 5:</b> Relapse/Continued Use Potential	Despite active participation at a less intensive level of care, the client is experiencing intensification of addiction symptoms (cravings/drug seeking related behavior) and is deteriorating in his/her level of functioning despite revisions in the treatment plan. <b>Dual Diagnosed Enhanced Programs</b> The client's status in Dimension 5 is characterized by psychiatric symptoms that pose a moderate risk of relapse to the alcohol, drug or psychiatric disorder. The client has impaired recognition or understanding of and difficulty in managing relapse issues and requires Level II.1 Dual Diagnosis Enhanced Program services to maintain an adequate level of functioning.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Dimension 6:</b> Recovery Environment	Environment not supportive, but with structure and support the client can cope. The situation is characterized by one of the following: <input type="checkbox"/> a. Continued exposure to current job, school or living environment will make recovery unlikely, and the client has insufficient or severely limited resources or skills needed to maintain an adequate level of functioning without this level of service; or <input type="checkbox"/> b. The client lacks social contacts, or has inappropriate social contacts that jeopardize recovery, or has few friends or peers who do not use alcohol/drugs. The client also has insufficient or severely limited resources or skills to maintain an adequate level of functioning without this level of service. <b>Dual Diagnosed Enhanced Programs</b> A living, working, social and/or community environment that is not supportive of good mental functioning characterizes the client status in Dimension 6. The client has insufficient resources and skills to deal with this situation.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>Recommendations/Notes:</b> Does meet requirements for this level of care.          <div> <div>Print Counselor Name: Beth Pidcock2</div> <div>Counselor Signature/Credential:</div> <div>Date: 06/29/18</div> </div>
